

## Intermediate Mechanical Designer/Draftsman

### Career Opportunity:

Brunette Industries Ltd is a leading supplier of wood processing machinery for the Biomass/pellet, and forestry industries.

We require an **Intermediate Mechanical Designer/Draftsman** for our New Westminster facility. The ideal candidate will join our Engineering team and participate in the design and detailing of capital equipment primarily sold to the Forestry/Biomass Industries. Experience in machine design will be a required asset.

The candidate will have strong communication skills and be very organized in both digital and hard copy formats. The candidate will be able to manage several different types of projects including Capital Equipment, R&D, and Process Improvement. The candidate will be highly motivated and able to think outside of the box. Strong problem solving skills will be an asset.

This is a full-time position based out of New Westminster, BC.  
The candidates' main function will be operating a SolidWorks workstation.

### Qualifications:

- Mechanical Engineering diploma or degree.
- **Three (3) to Seven (7) years experience in drafting experience**
- **Minimum Two (2) years experience with SolidWorks and 3D modeling**
- Excellent communication/people skills
- Excellent time management skills and the ability to work autonomously.
- Hands-on experience in a machine shop an asset

### Responsibilities:

- Provide Mechanical Designs i.e. (3D Models / Assemblies / Detail Drawings)
- Work closely with Engineering and Production teams in the preparation of designs and working drawings.
- Process Engineering Change Orders (ECO).
- Check drawings for conformance to industry drafting standards.
- Generate detailed cut-lists and BOM's from completed drawings.
- Incorporate information from verbal discussion, drawings, sketches, photos, etc. into detailed fabrication and manufacturing drawings.
- Assist, maintain and recommend improvements in design concepts, layouts, assembly drawings, detailed drawings and solutions by investigating and analyzing customer specific problems.
- Ensure form, fit and function of multiple components.
- Cost estimates and "Value" Engineering.
- Monitor and report progress to senior management.
- Work under supervision and duties as assigned.

**Skills:**

- Ability to take on a project from verbal or written instructions
- Meet tight deadlines when required.
- Open-minded and able to accept constructive criticism and changes.
- Aptitude for creative problem solving.
- Functional & competent in tolerancing and welding procedures
- Excellent English communication skills (written and verbal).
- Proven ability to conceptualize in 3D.
- Ability to manipulate and organize large multiple part in Solid Works.
- Experience and understanding in manufacturing processes.
- Perform tasks in a timely and efficient manner.
- Machine component selection and drive design.
- Engineering and calculations for stress and fatigue.
- Basic understanding of pneumatic and hydraulic systems

**Computer Skills:**

The candidate will be required to have strong computer skills and be familiar with most aspects of standard windows applications.

Required:

- Solid Works
- AutoCAD
- MS Excel
- MS Word
- MS Outlook

Asset:

- Visual Manufacturing
- MS Project
